

Video Slots AdHoc Testing Report:

Tested Date : 03/07/2023

Tested By: Kaushik

Observations:

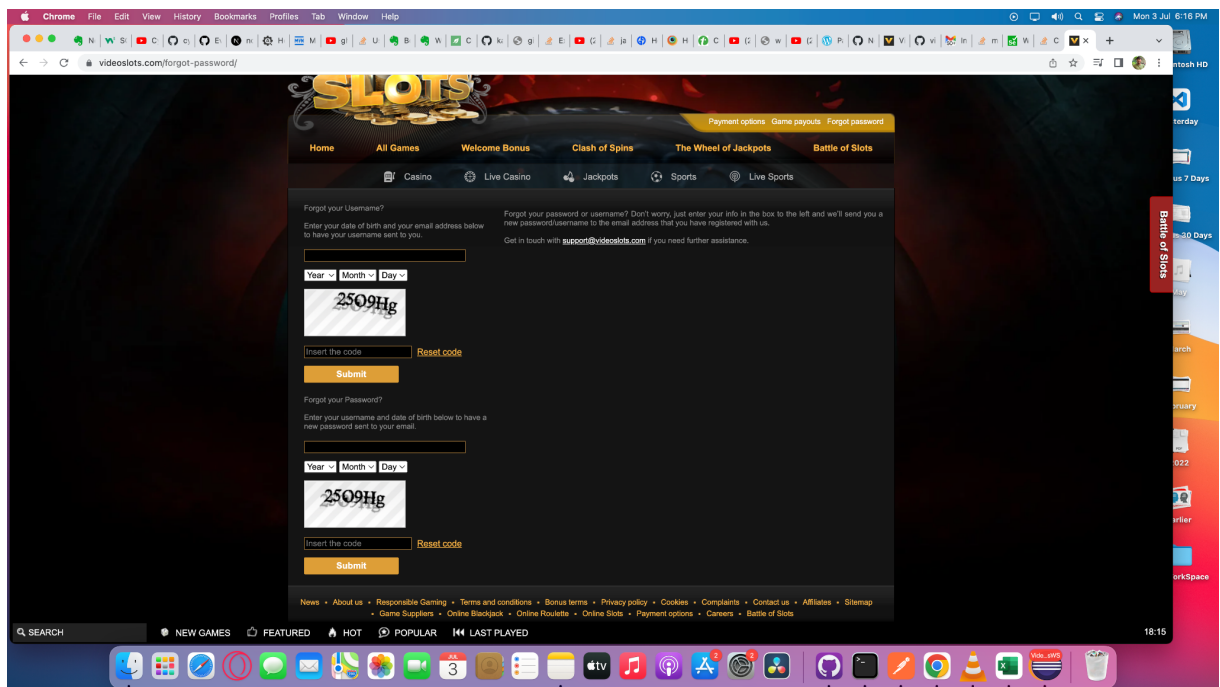

1. Summary : Forgot password page is showing two forms to reset password.

Severity: Critical

Priority : High

Steps For Replication:

1. Go to videoslots.com website.
2. Click on the forgot password link.
3. When the password reset page is loaded, the user can see two captcha and email, date of birth inputs fields, which throw an error, after the details are entered.

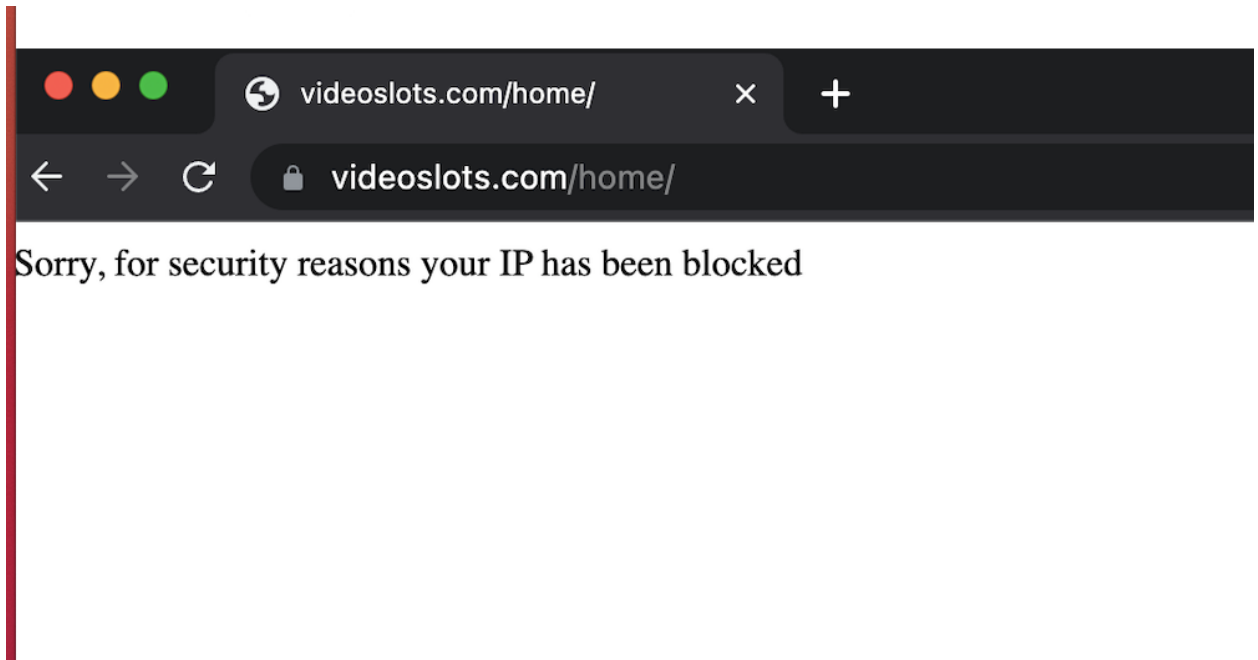

2. Summary: Just after a little surfing, the user is getting IP blocked for security reasons message.

Severity : Major

Priority : High

Steps For Replication:

1. Go to videoslots.com website.
2. Surf through the website for a while.
3. Users would see an error saying the IP address is blocked from accessing the website.

3. Summary : All Icons beside links attached to the top nav bar aren't clickable.

Severity: Trivial

Priority : Low

Steps For Replication:

1. Go to videoslots.com website.
2. Try to click on the support or play responsibly icons attached to the top nav bar.
3. These icons are not functional whereas chat and phone icons are clickable.
Inconsistent style pattern.

The website says my IP is blocked for further, due to which I aborted my testing at this point and reported only the bugs which I came across in the few minutes of testing I conducted.
